

RGL1

SINGLE LEG WEBBING LANYARD & SHOCK ABSORBER

An industry standard, and usually the minimum equipment issued/required with a harness for anyone working at height.

We use 32kN polyester webbing to manufacture this product which helps give the product a longer life. It is also treated with a water repellent coating which also extends the life of this product. This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point.

If movement between anchorages is required, a twin leg lanyard should be used (RGL3) to provide constant protection.

Shock absorber

Accredited to: EN 355:2002

Web material: 26mm water repellent polyester 32kN

Fittings: 17mm steel screwgate karabiner (RGK1) & any compatible EN 362 connectors

Max arrest force: <6kN
