

RGL11

KERNMANTLE ROPE LANYARD

This single leg fall arrest safety lanyard is manufactured from kernmantle rope (which shows resistance to alkalis, oils and organic solvents).

It must be used by an operative who is working from a static position when connected to a fixed anchor point, it can also be choked around a pole or similar structure. It comes equipped with a shock absorbing pack, so that in the event of a fall the forces on the user's body are reduced.

Shock absorber

Accredited to: EN 355:2002
