

RGA2

FALL ARREST BLOCK - 10M RGA2

The RGA2 is a multi purpose fall arrest block, which allows uninhibited movement during normal working activity.

The carrying handle is part of the cast alloy housing and can be connected to the anchorage point using soft slings or a connector.

For self-connecting to the block, it is recommended that the operative uses an extension strop (RGL4) in order to ease the task. The RGA2 is supplied with galvanised wire cable.

EN 360:2002

Line material:	5mm galvanised wire
Case material:	Alloy
Connector(s):	Double action high tensile steel swivel karabiner
Weight:	6.7kg
Max user weight:	140kg
Max force:	<6kN

FEATURES

Built-in fall indicator
