

RGK23

23MM BENT GATE ALUMINIUM KARABINER RGK23

A versatile and durable tool for a variety of climbing applications.

This lightweight bent gate karabiner is ideal for reducing the load during climbs or carrying gear. A versatile and durable piece of kit suitable for sport climbing and mountaineering.

The single action mechanism requires the user to only push the gate to open, making it highly efficient in situations where speed matters.

The ergonomically curved gate allows for faster, easier clipping of ropes. Perfect for quickdraws and sports climbing where smooth clipping is essential.

The smooth gate action springs back into place quickly and easily for a seamless clipping experience.
