

RGK24

22MM WIRE GATE ALUMINIUM KARABINER RGK24

Manufactured for climbers, adventurers, and outdoor enthusiasts, our wire gate karabiner offers the perfect balance of strength and convenience.

The wire gate keeps the karabiner lightweight and ensures minimal bulk, it also offers a smooth operation.

Built from durable aluminium alloy, this karabiner provides a reliable hold without the added weight of traditional models.

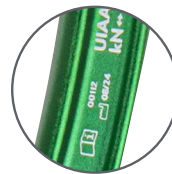

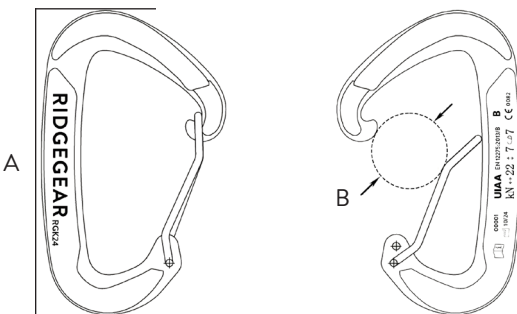

The curved notch and smooth, rounded edges of the karabiner means rope won't snag, whilst also ensuring a comfortable grip for easy handling. A wide gate opening gives ample space for clipping ropes, slings or hardware easily.

The smooth gate action springs back into place quickly and easily for a seamless clipping experience.
